ML Day 3

16 April 2026 06:04 PM

Collect Data → DP → Algorithm → New data → o/p

Simple

Training

Test

Algorithm → Supervised → Regression, Classification

Supervised

Unsupervised

Reinforcement

→ Regression Alg

→ Predict Numerical values

→ Use reg in ML?

→ Train machine using Reg?

S → Reg → Types

→ Linear Regression → v.v.imp

→ Multiple L.R

→ Polynomial L.R

→ Ridge Reg

→ Lasso Reg

→ Linear Regression

→ when relationship b/w input & output follows straight line Pattern

input → independent (x)

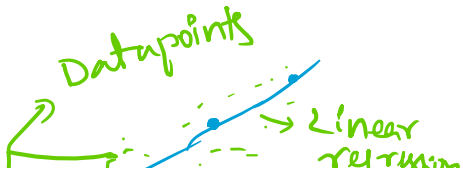
output → Dependent (y)

→ Ind (x) → 1000 ✓ S-H

(y) Dep → 1000 Marks

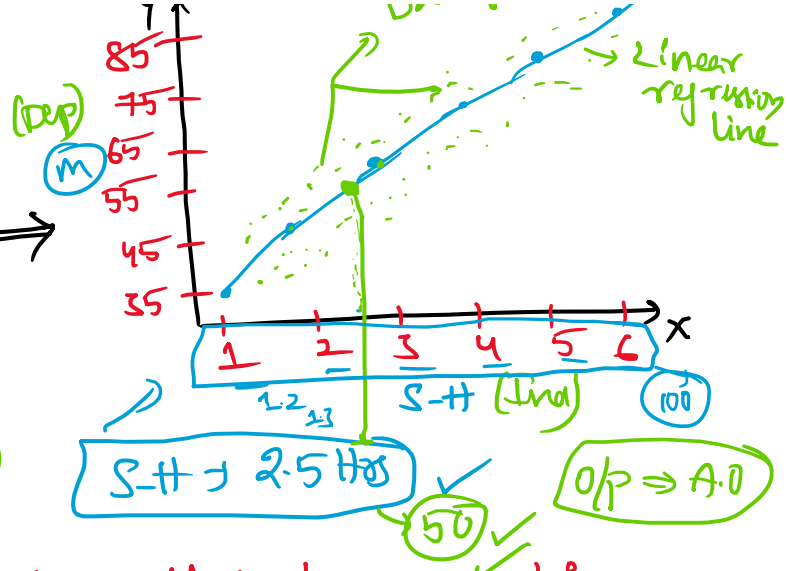
35 ✓

LR



S-H	Marks
1	35
2	45
3	55
3.5	60
4	65
4.5	70
5	75
6	85

Reg



→ L.R draws a straight line that best explains the relationship b/w SH and Marks and uses that line to predict marks for New Study Hours.

linspace (0, 12, 100)

0 1 2 3 4 5 6 7 8 9 10 11 12

2.4 → O/P X

Alg → Sup → Regression → LR

→ Classification → Logistic Reg, KNN, SVM, DT, RF

Classification Alg

→ Predicting Categories / labels

Yes / No

Pass / Fail

Spam / Not Spam

Spam/ Not Sp

Logistic Regression → ✓

→ Classification

→ Predict Categories

2 → Yes / No ✓

⇒ Post in linkedin → Link ⇒ Discord

ML pipeline → CD → DP → Alg → Newdata → O/P ✓ Discord

→ Picture, Diagram ✓

Tag

2 hrs →

② Take data ⇒ use linear reg. logistic reg

Streamlit ✓ O/P ✓

⇒ regr →

Class →
