# ML Day 8

24 April 2026 06:46 PM

→ Convert raw text data → meaningful Predictions

Data → ND → logistic

ML Deployment pipeline

→ Problem Understanding

→ Data Collection

→ Data Preprocessing — EDA ✓

→ Label Encoding

→ NLP Preprocessing

→ Vectorization

→ Train (80%) Test (20%) Split

Train → learn

Test → evaluate

→ model Building

Algorithm = Logistic ✓

→ model Evaluation

Accuracy → 89% ✓ → >95%

Confusion matrix

→ Cross validation

→ Train model multiple times

→ reduce bias ✓

→ reduce bias ✓

→ Deployment (Streamlit)

Enter review

System

O/P

Data + Processing + model + Evaluation + Deployment

Machine Learning
